The new ST2000 range from SwiftAir...

The new ST2000 range of ceiling hoists exclusively from SwiftAir mark a significant advance in the world of patient handling. The world class design and state of the art features ensures safe, reliable and effective hoisting for patients and carers alike. The small, compact and aesthetically pleasing design together with the extensive range of track configurations and opportunities make this system one of the most versatile available on the market today.

Some of the features include:-

- Small and aesthetically pleasing design
- Four weight capacities - 130kg, 160kgs, 200kgs, 280kgs
- Very low profile hoist module giving greater lifting height
- Available either manual or powered traversing options with slow start / stop
- State of the art LED display with lift counter
- Manual and powered emergency override operation
- Diagnostics facility for user and service engineer
- Pneumatically operated hand control for wet environments
- Service due indicator
- Two year warranty

Ergonomically designed handset for safe use in wet environments

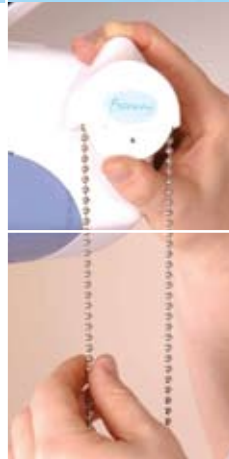

Manual emergency lowering in the event of power failure for total peace of mind

Neat secure spreader bar system

LED display provides vital information for the user and carer

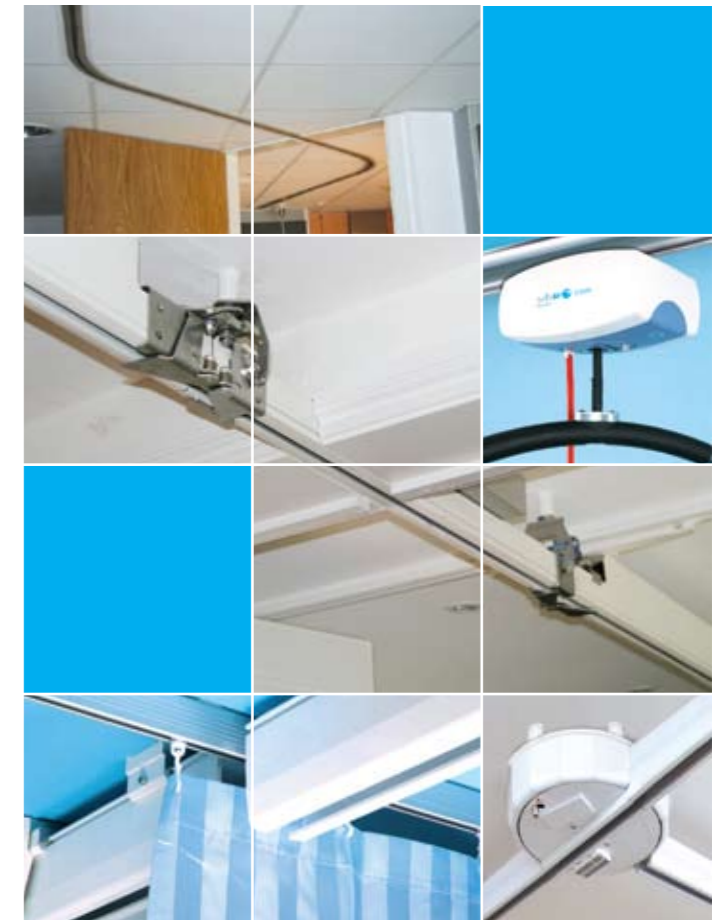

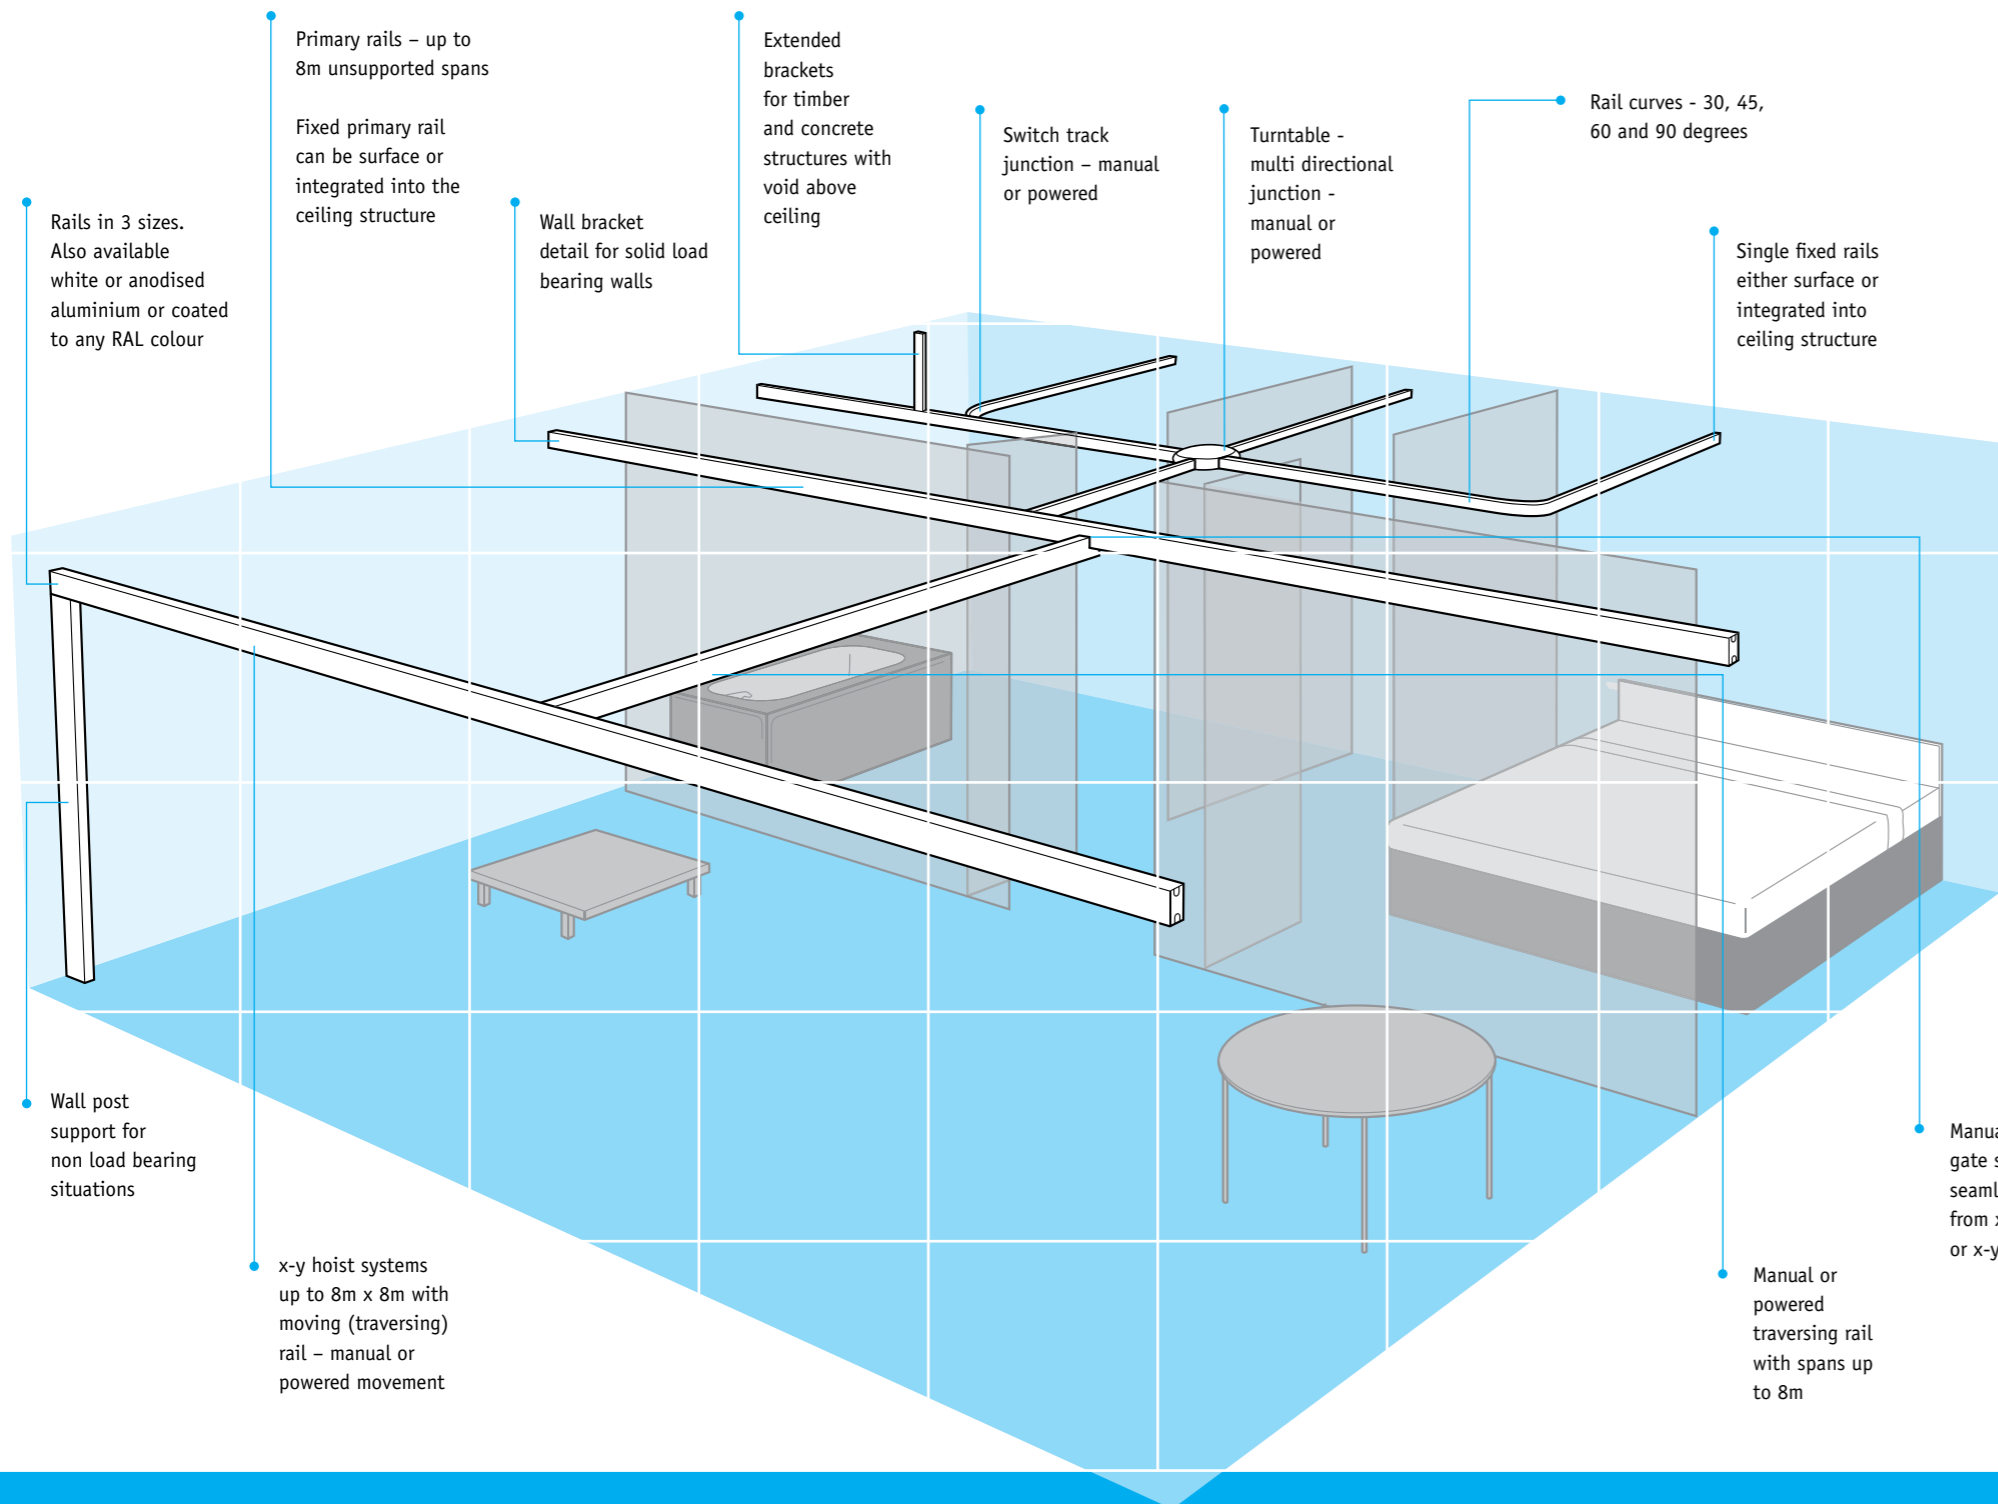

Discreet automatic end of rail charging station with integral transformer - IP67 rated

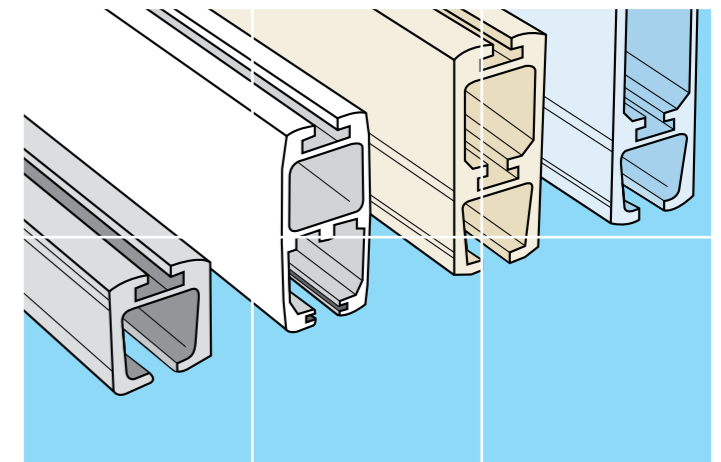

SwiftAir can provide solutions virtually anywhere...

...we can even integrate into the ceiling construction...

...with a vast range of rail systems available...

...the complete solution!

An approved **NHS** supplier

V5 Duo from SwiftAir...

The new V5 duo is equipped with the unique feature of two weight capacity options. The V5 Duo is supplied as standard with a weight capacity of 100kgs and has the option to increase the lifting capacity to 200kgs, this enables the system to be adapted to various care environments, either at home or in the care home and a smaller less obtrusive rail can be used.

Small and sleek design which blends in well to any home environment

The new V5 Duo handset is ergonomically designed for ease of use. The casing allows a degree of water infiltration protection, also, the new tactile membrane withstands high usage. The cable is resistant to stretching and retracts to it's original length.

Unique self powering auto gate system allowing safe and seamless transfer from x-y system to fixed or another x-y system

Self powered turntable providing multi directional options

Self powered switch tracks giving added flexibility where more than one location requires access

A Hill-Rom Company

Liko from SwiftAir...

SwiftAir are pleased to be able to offer the Liko quality range of ceiling hoists to our customers.

Liko is a well known established product and benefits from an extensive range of ceiling hoist systems together with specialist bariatric options that can lift up to 500kgs plus.

This Swedish manufacturer offers excellent solutions for the heavy duty market and the slings and accessories/options are second to none.

The extensive rail system offers choice of rail size to cope with large unsupported spans.

The bariatric twin motor unit working in tandem to support weights up to 500kgs, this system allows positioning and rotation through 360 degrees.

The bariatric twin motor unit
